

Sabyasachi Mondal

Student Founder & Programmer — Sabyx Labs

s.mondal.leaddev@gmail.com +91 93826 05574 Mallarpur, Birbhum, West Bengal, India github.com/SabyaCodeForge x.com/Sabyasachi49701

PROFILE

Class 10 ICSE student, developer, and technology enthusiast with a strong interest in software development, web technologies, robotics, electronics, and entrepreneurship. Founder of Sabyx Labs, focused on transforming ideas into practical digital products — from responsive web applications and Progressive Web Apps to Arduino-based electronics and early-stage product concepts.

"For me, technology is not just about writing code — it's about identifying problems, thinking creatively, and building meaningful solutions."

EXPERIENCE

Sabyx Labs 2026 – Present

Founder & Lead Developer

A student-led technology initiative focused on exploring and building practical digital products and technology solutions — from concept through prototype.

- Conceptualize and develop software product ideas based on real-world problems
- Design responsive web applications and Progressive Web Apps
- Experiment with modern web technologies and AI-assisted development
- Develop product concepts for students, schools, small businesses, and everyday users
- Work across ideation, interface design, development, testing, and iteration

SELECTED PROJECTS

School Registration & PDF Generation System PROTOTYPE

A digital registration solution intended to simplify student data collection and reduce manual administrative work.

Digital registration · PDF generation · Print-ready output · Responsive · PWA

Sabyx CRM CONCEPT

A lightweight CRM platform for small businesses and independent users to organize day-to-day operations.

Client management · Invoicing · Task tracking · Basic analytics · Responsive

Sabyx Drop CONCEPT

A lightweight file-sharing product concept focused on making file transfer straightforward and accessible.

Simple UX · Minimal interface · Fast interaction · Responsive

BetaView CONCEPT

A micro-beta-testing initiative providing developers with practical feedback from a student/user perspective.

Test · Identify issues · Structured feedback · Iterate

Arduino Robotics & Electronics Projects ONGOING

Hands-on experiments with sensors, motors, displays, detection systems, and basic automation — building practical understanding of electronics, hardware integration, and prototyping.

Arduino UNO · Sensors · Motors · Electromagnets · Infrared & motion detection · Automation

TECHNICAL SKILLS

Programming

- Java
- Python
- QBasic

Web Development

- HTML, CSS, JavaScript
- Responsive Design
- Progressive Web Apps

Hardware & Electronics

- Arduino UNO
- Sensors & Motors
- Embedded systems
- Prototyping

Development & Tools

- GitHub
- AI-assisted development
- UI/UX prototyping

Currently exploring: Advanced JavaScript, full-stack development, artificial intelligence, software architecture, product development, entrepreneurship, robotics & embedded systems.

EDUCATION

St. Paul's School Session 2026–27

ICSE — Class X · Indian Certificate of Secondary Education

Academic interests: Computer Applications, Mathematics, Physics, Chemistry, Biology, Technology & Engineering.

ADDITIONAL INFORMATION

Languages

English, Bengali, Hindi

Interests

Cricket, travelling, mountains, and peaceful places

Full portfolio, live demos, and project details: sabyacodeforge.github.io/Portfolio-
